

### How to Use

It's as simple as plug, place and wait. But not for long! Follow the steps below to quickly get charging:

### To use your wireless charger:

1. Plug the USB-C cable into a power adapter.
2. Plug the power adapter into a power outlet.
3. Place your wireless charging compatible device onto the center of the charger pad.

### Compatibility

Wireless Charger is designed to work with all devices with wireless charging capabilities.

### Product Safety

We want to make sure you're as safe as possible when you're using any Griffin device. Please be sure to read all instructions and warnings before you use your Fast Wireless Charger.

1. Please do not disassemble or reassemble this product.
2. Avoid use in high temperatures or damp environments.
3. Please be sure there are no metal materials (like iron sheets, finger rings, metal protective shells, etc) on the back of your phone. In order to work properly, the charging pad must make complete contact with the back of your mobile device.

## FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC RF exposure statement:

The equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance between 20cm the radiator your body.
