schematics.pdf (...)

Question #2: In the user manual, there is no place mentioned 2.4GHz operation. In addition, page 14 and 15 of user manual suggested the user can change the output power by percentage. Please provide the manufacturer factory setting for 2.4GHz to ensure the output power will not be tuned by the end user above the certified output power (802.11g mode Peak :27.22dBm, Average :17.5dBm; 802.11b mode: peak 17.63dBm , average:14.86dBm).

<answer>pls see revised user's manual(Page 7 & 15), Factory installed channel limits documented <ChannelLimits1.pdf>.
