

FCC ID: AA01502117

Description of the 15-2117 RF Remote Control

The 15-2117 RF is a universal remote control that allows users to operate audio/video (A/V) equipment using radio frequency (RF) or infrared (IR) signals. When used in conjunction with the Command Center receiver, this remote control can operate audio/video equipment with 100 feet, not necessarily in line of sight with respect to the user. The 15-2117 RF can also be used as a stand-alone IR remote control unit, and can control up to eight A/V devices.

This device is part of an extensive line of infrared and RF remote control products that Universal Electronics Inc. designs, manufactures, and sell in the United States and abroad.
