

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 This photograph shows the internal components of the EUT, including the green printed circuit board (PCB) and the black plastic housing. A black cable is connected to the board. A ruler is placed horizontally below the assembly for scale, showing measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm).
Solder Board-Component View 1	 This photograph provides a close-up view of the PCB components, including a large circular component with a yellow and pink spiral pattern. A ruler is placed horizontally below the assembly for scale, showing measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm).

Solder Board-Component View 2	 A photograph of a green printed circuit board (PCB) with various electronic components, including integrated circuits, capacitors, and connectors. The board is positioned next to a black ruler with white markings in millimeters. The ruler shows measurements from 0 to 100 mm. The board has a black cable connected to a connector on the left side. The components are densely packed on the board.
Solder Board-Component View 3	 A photograph of the same green PCB from a different angle, showing the underside or a different side. It features various components, including a large black integrated circuit, several capacitors, and connectors. A black cable is connected to a connector on the left. The board is placed next to a black ruler with white markings in millimeters, showing measurements from 0 to 100 mm. The board has a black cable connected to a connector on the left side.

Solder Board-Component View 4	 A photograph showing the top surface of a green printed circuit board (PCB) populated with various electronic components. A black cable is connected to a port on the left. A silver SIM card is inserted into a slot on the right. The board is placed on a blue surface next to a black ruler with white markings in millimeters. The ruler is oriented vertically on the left and horizontally at the bottom.
Antenna View	Wireless Charger Antenna  A photograph showing the bottom surface of the green PCB. A prominent feature is a circular, spiral-shaped antenna made of pinkish-gold conductive traces. A red rectangular box highlights the antenna area, with a red line pointing from the text label 'Wireless Charger Antenna' above it. The board is placed on a blue surface next to a black ruler with white markings in millimeters. The ruler is oriented vertically on the left and horizontally at the bottom.
