BLAVOR
USER MANUAL

PN-W37
5000mAh/Portable Power Bank

Thank you for choosing BLAVOR. To assist you in understanding the product, we have provided a comprehensive manual that includes an introduction to the product, user guide, and other relevant information. Prior to using PN-W37 PORTABLE POWER BANK, please make sure to carefully review the manual to ensure proper usage.

Product Details

Product Parameters

Lightning Input Port	DC5V/2A
USB-C Input Port/Plug	DC5V/2.4A 9V/2A 12V/1.5A
USB-C Output Port/Plug	DC5V/3A 9V/2.22A 12V/1.67A
Wireless Output	2.5W (Apple Watch)
Battery Capacity	5000mAh/3.7V 18.5Wh

Package Include

Power Bank*1
Charging Cable *1
User Manual *1

Product Features

1. Unique design, stylish, and beautiful.
2. High-quality lithium-ion batteries, safe and stable.
3. It employs an ultra-strong suction magnetic sheet that is compatible with all current Apple Watches, ensuring a secure grip and preventing accidental detachment.

Instructions

1. Power On/Off

Press the power button to turn on the machine, and the battery indicator light will light up. If no charging device is connected, the power bank will automatically shut down after 10 minutes. Alternatively, you can force the power off by double-clicking the button.

2. To charge the power bank

- Insert the USB-C plug of the power bank into the USB-C port of the charging plug to charge the power bank.
- Insert one end of the cable into the USB-C port or Lightning port of the power bank, and the other end into a USB wall charger cube. The power indicator light will flash during charging. Once fully charged, the power light will show 100% and remain on.

3. To charge electronic devices

- Press the power button to activate the power bank, or directly plug your mobile phone into the power bank's built-in USB-C plug. Once the LED power indicator lights up, the connected electronic device will start charging.
- Use the mobile phone charging cable to connect the USB-C port of the power bank, and plug the other end into the device that needs to be charged to charge the corresponding device.

4. Apple Watch wireless charging

Press the power button to activate the power bank. The battery indicator light will illuminate, indicating that the product is now in standby mode. Position the watch over the wireless charging emission area of the product, and it will automatically attach to begin wirelessly charging the watch.

Product Maintenance

To ensure the best efficiency of this product, please pay attention to the following reminders.

1. Keep away from moisture and corrosive substances.
2. Do not use chemicals to clean the product.
3. Charge the power bank once every 3 months when it is not used.

Troubleshooting

1. This product is suitable for charging plugs within the DC5V/3A. Using a charging plug exceeding this specification may cause damage to the product.
2. Please do not disassemble or modify this product.
3. Please pay attention to fire and moisture, to prevent malfunction.
4. Do not use this product in a high-temperature environment [$>113^{\circ}\text{F}$ (45°C)]
5. Please connect the equipment that meets the output specification of this product.
6. If the battery expands, leaks, or emits a strange smell, please stop using it immediately.

Frequently Asked Questions and Solutions

- Turn on the power switch and the blue LED battery indicator will flash.
- The battery is about to run out, please charge this product immediately

During the warranty period,if there are problems caused by manufacturer defect(as verified by our engineering team), BLAVOR will be responsible for it and our team will be with you until you are satisfied.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. The device has been evaluated to meet general RF exposure requirement.

The device can be used in portable exposure condition without restriction.
