## User Guide

Video Doorbell

**Repeater:anyfree-MLZJ01-M  
Smart Doorbell:anyfree-ML01-M**

### O1 Set up your Video Doorbell

**O1.1 Download the Hello Doorbell app**

Search for "Hello Doorbell" in one of the app stores above, or scan the QR code on the back of the doorbell to download the app.

### O2 Chrage the doorbell

Full down the mounting bracket of the doorbell, find the charging port.

Plug the TYPE-C power cord into the doorbell to charge before installation. It must be fully charged before installing the doorbell.

### O3 Turn on the doorbell

The doorbell is off by default at the factory. Please make sure to turn on the doorbell before setting up.

### O4 Plug-in your signal station

Plug it into the power source. Once the light is solid red, it's ready to prepare your doorbell.

### O5 Set up your Video Doorbell near your signal station

Long press the side bottom on the signal station. When the light starts flashing green, connecting the device via WiFi-haloo.

### O6 Connect to wifi

Follow the In-app instructions to set up your doorbell.

**O7 Select connection method**

We provide two connection methods:

- Bluetooth connection
- Scan code connection

### A Bluetooth connection

- Turn on the Bluetooth in phone system setting.
- Searching for anyfree signal station and connect

### B Scan code connection

- Scan the QR code on the phone with your doorbell.
- When the prompt sounds, it means the scan is successful.

### O2 Install your Video Doorbell

**O2.1 Set installation height**

Install your Video Doorbell approximately five feet (150 meters) above the ground for optimal performance. If you're connecting to existing doorbell wiring that's higher than four feet and want to angle your Video Doorbell down for a better view, you can purchase a Wedge Kit online at [anyfree.com/accessories](#).

"Optimal" is defined as existing conduit that sits lower than the breaker. Then remove it from the wall and disconnect the wires.

### O2.2 Mark the screw holes

Use the bracket as a template to mark the holes. The recommended install height is 5 feet above the ground. The holes are 105.5 mm apart.

### O2.3 Attach your Video Doorbell to the mounting bracket

Mount the doorbell above the hanging plate by 5-10mm, align it horizontally, stick it securely, slide it downwards, and hang it tightly.

**CAUTION!**

If you use the wrong screws to secure the Video Doorbell, you could damage the battery during installation, create a fire hazard, and be seriously injured.

### O2.4 Install the anchor(Optional)

If installing on stucco, brick, or concrete, use a #6 stainless drill bit to drill holes in your wall, then insert the included anchors with KA3P30 screw.

The holes are 86.5 mm apart.

### O2.6 Attach the anchor to the mounting bracket

Attach the mounting bracket to the anchor using KA3T10 screws, then follow the instructions from step O2.4.

### O3 No need to charge

The doorbell operates on solar energy, eliminating the need for recharging.

### O3.3 AR interaction

During a video call with visitors, you can see all effects by waving your hand and take photos to capture the moment. Keep in mind that different festivals may offer different special filters. Stay tuned for more updates!

### O3.2 Ignore distance in open areas

The doorbell can transmit signals over a distance of more than 1km with the help of WiFi-haloo technology.

### O3.4 Motion detection

To set up the doorbell, click on the detection environment to activate the millimeter wave radar monitoring. Once the monitoring is done, you'll receive a prompt and the millimeter wave radar will monitor your doorstep in real-time.

Operation Plug x 2	Screwdriver x 1	Anchor x 2
KA3P30 x 2	KA3T10 x 2	Double sided Tape x 1
Security Screen x 1	USB Cable x 1	

### FCC WARNING:

This equipment may generate or use radio frequency energy. Changes or modifications to this equipment may cause harmful interference unless the modifications are expressly approved in the instruction manual. The user authorizes the authority to operate this equipment if an unauthorized change or modification is made.

This device complies with part 15 of the FCC Rules. Operation is subject to the following conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio-frequency energy and it must installed and used in accordance with the instructions, may cause harmful interference to radio communications; however there is no guarantee that interference will not occur in a particular installation. If the equipment does cause harmful interference to radio or television reception which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Relocate or reorient the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
- The rating information is located at the bottom of the unit.

This equipment complies with FCC radio-exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
