- Power Input: 5V DC, 180mA
- Power Connection: USB-C
- Charge time: ~1.5 hour
- Battery Capacity: 3.7V DC, 250mAh
- Operating Frequency Range Bluetooth 2402 - 2480MHz
- Maximum RF Output Power: -2.64dBm

Caution: Risk of explosion if the battery is replaced by an incorrect type. Dispose of used batteries according to the instructions.

PACKAGE CONTENTS

- Bluetooth Keyboard with trackpad
- Built-in Protective Case
- USB-C charge cable
- User's Manual

CASE INSTALLATION

1. Place your case on a flat surface.
2. Align your device's camera with the camera opening on the case.
3. Insert your device at an angle starting at the top (camera side).
4. Let your device rest on the bottom of the case and gently press it down into the case.
5. Press around all the edges to ensure your device is installed properly in the case.

VIEWING ANGLE ADJUSTMENT

The Bluetooth Keyboard features a built-in hinge that works together with the cover-stand to create multiple viewing angles.

To adjust the viewing angle, hold the top edge of the tablet case and use your other hand to adjust the hinged stand to the desired angle.

POWERING YOUR KEYBOARD

Ensure your keyboard has been charged using the included USB-C charging cable and a compatible USB-C 5V charger (not included). You can also charge your keyboard from a compatible USB-C port on a computing device.

TO POWER ON:

Locate the Power key on the top right corner of your keyboard. Press and hold the Power key for 1 second until the power LED lights up solid, then release.

TO POWER OFF:

Press and hold the Power key for 3 seconds. The power LED will flash 3 times, indicating the keyboard has been powered off.

STANDBY MODE:

Your keyboard will go into Standby mode after 40 seconds of inactivity. Press any key to wake it.

PAIRING YOUR KEYBOARD

The Bluetooth Keyboard can pair with up to 2 devices. Once paired, you can easily toggle between devices by pressing the Bluetooth 1 and Bluetooth 2 keys on the keyboard. To pair, follow the instructions below.

1. Ensure your device's Bluetooth connection is enabled.
2. Press and hold the ⌘ 1 or ⌘ 2 key for 3 seconds. Release the key after the LED on the Power key begins flashing rapidly. Your keyboard is now in pairing mode.

3. Go to your device Bluetooth settings and search for "UAG Keyboard OXXXX". The last four digits should coincide with the digits listed on the white label located to the left of the track pad.
4. Select the appropriate keyboard on your Bluetooth device list.
5. You will immediately be prompted to enter a security passkey.
6. Key in the corresponding 4-digit passkey on your UAG Bluetooth keyboard followed by the Return or Enter key.
7. Your Keyboard should now be paired and connected with your device.
8. Repeat the steps above to pair a second device or if the pairing process fails.

BATTERY LIFE CHECK

Press fn + "B" key. This will cause the LED indicator on the Power key to flash one of the following ways:

1. Four flashes = ~ 80% - 100% battery life.
2. Three flashes = ~60% - 79% battery.
3. Two flashes = ~35% - 59% battery.
4. One flash = low battery <34%

To help preserve battery life, your Bluetooth Keyboard will enter sleep mode if left on and not used for several minutes; press any key to wake it.

FUNCTION KEYS

- ⌘1 **BLUETOOTH 1:** Pairs your keyboard with the preferred device.
- ⌘2 **BLUETOOTH 2:** Pairs your Keyboard to a second device. If you have paired with other devices, press ⌘1 or ⌘2 to instantly switch between them.
- **HOME:** Displays your device's home screen.
- 🔒 **LOCK:** Activates and deactivates your device's sleep mode.
- 🎤 **MICROPHONE:** Activates Siri
- 🌐 **LANGUAGE SYMBOL:** Toggles between keyboard languages (if active on your device).

FCC STATEMENT

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
 - Increase the separation between the equipment and receiver.
 - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
 - Consult the dealer or an experienced radio/TV technician for help
- Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

ICES-003 Class B Notice - Avis NMB-003, Classe B

This Class B digital apparatus complies with Canadian ICES-003.

Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

This device contains licence-exempt transmitter(s)/receiver(s) that comply with Innovation, Science and Economic Development Canada's

licence-exempt RSS(s). Operation is subject to the following two conditions: (1) This device may not cause interference. (2) This device must accept any interference, including interference that may cause undesired operation of the device.

L'émetteur/récepteur exempt de licence contenu dans le présent appareil est conforme aux CNR d'Innovation, Sciences et Développement économique Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes :

(1) L'appareil ne doit pas produire de brouillage; (2) L'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.
