RE: Tadiran Telematics Ltd.

FCC ID: NTAMMR1

I have a few comments on the above referenced Application.

- 1) In order for a device to be authorized as a general PC peripheral device (and also obtain a additional grant for this device), it must be tested in a minimum configuration as specified by ANSI C63.4 Section 11.2. If you wish to pursue this approval, then you will need to provide additional digital device test data with the device tested in this minimum configuration. However, if this device is only to be used in the specific configuration specified in the last response (and not authorized as a general purpose PC peripheral device to the public), then we can issue the current grant with certain conditions:

proposed grant conditions regarding digital device requirements:

"This device is only for use by with a pocket PC for use by Public Utility personnel as specified within the application".

Please let us know which route to compliance you wish to take.

- 2) FYI, We are checking to see if you explanation of the antenna connector is acceptable to the FCC.

Timothy R. Johnson  
Examining Engineer

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
