> Question #1: This device is desktop WLL phone with handset. When handset is
> used during voice communication, only audio signal was carried. In the
> Part 22 test report, the device is classified as " Non-Broadcast Transmitter
> held to ear " is not correct. Please change the classification to Licensed
> Non-Broadcast station Transmitter - TNB "

====> We've revised the RF Report. (page: #1 & #3)

Please find the attached test report. (filename : ATT. C (RF
REPORT).doc)

> Question #2: In the past, FCC only require to demonstrate band edge
> compliance. Recently, FCC has instructed test lab and TCB that that Part 22
> device needs to demonstrate block edge compliance. Attached please find
> FCC notice . Please provide block edge measurement.

====> We've retested. (page: #10 ~ #17)
Please find the attached test report. (filename : ATT. D (TEST
PLOT).doc)

> Question #3: In the user manual, this WLL phone can be connected to
> external antenna as well. In the RF test report, there is no indication
> that such antenna was used and tested. Please explain.

====> We've revised the user manual to remove the external antenna part.
Please find the attached test report. (filename : ATT. M (USER
MANUAL).doc)

>
> Question #4: SAR Test report: Page 12 of test report provided liquid
> parameter used during the tests. Page 12 indicates on June 03 the head
> tissue was used but the target value is for body. The liquid parameter
> was used in June 02 body SAR tests are same as June 03 measured liquid
> parameter. Please go over your liquid parameter information on Page 12 Vs
> the liquid parameter reported in SAR plots..

==> We've made a mistake for test date and liquid type.
So, we've changed the test date and liquid type.
Please find the attached test report. (filename : ATT. S (SAR
REPORT).doc)

> Best Regards
