

Solder Board-Component View 13	 A photograph of a green printed circuit board (PCB) populated with various electronic components. A yellow multi-pin connector is visible on the left side. A large red electrolytic capacitor is positioned near the center. Several integrated circuits (chips) are soldered onto the board, including a prominent square chip in the upper right. The board is placed on a black surface with a white metric ruler (0-100 mm) and a white imperial ruler (0-8 inches) for scale.
Solder Board-Component View 14	 A photograph of the same green PCB from a different perspective. A large, rectangular, off-white component, likely a heat spreader or a large passive component, is mounted in the center of the board. The board is surrounded by various smaller components and solder joints. The same black background with white metric and imperial rulers is used for scale.
