Step 1 — Introduction to the Framework Laptop

- Unbox your Framework Laptop. You should not power it on at this time.

Step 2

- Locate the Framework Screwdriver in the package underneath the Framework Laptop and keep it handy - it's the only tool you'll need if you ever want to upgrade or replace any of the components in your Framework Laptop!

Step 3

- It is highly recommended you insert a USB-C Expansion Card into the Framework Laptop since it is difficult to directly plug a charger into the recessed USB-C receptacle that is inside the bay.

Step 4

- Assemble the modular Power Adapter. Connect the AC cable and the USB-C cable to the Power Adapter.

Step 5

- Plug in the charger into the USB-C Expansion Card and then connect the AC Cable to a power source.

Step 6

- Press the power button and turn on the Framework Laptop.
- Follow the prompts on the screen and begin using your Framework Laptop!
