

## Modular Approval Request Letter

Dear Sir,

There's a Wireless PCMCIA card that would like to have your authorization as a modular approval. The specific product as below, Wireless PCMCIA card, with its designed features and specified description, meets special requirements for full modular approval on FCC Public Notice DA 00-1407 by cross-reference list below.

Company	: Delta Networks, Inc.
Model Name	: Wireless PCMCIA card
Model Number	: LM-WP210RB
FCC ID	: PD5LMWP210RB

Requirement of Public Notice DA00-1407	Reference to LM-WP210RB
1. The modular transmitter must have its own RF shielding.	The module has its own RF shielding. Please see <a href="#">external photo.pdf</a>
2. The modular transmitter must have buffered modulation/data inputs.	The modular has buffered data inputs, it is in chip U5 (39VF010) of LM-WP210RB. Please see <a href="#">diagram.pdf</a>
3. The modular transmitter must have its own power supply regulation.	All power lines derived from the host device are regulated by U17 before energizing other circuits internal to the LM-WP210RB. Please see <a href="#">circuit.pdf</a>
4. The modular transmitter must comply with the antenna requirements of Section 15.203 and 15.204(c).	The LM-WP210RB meets the FCC antenna requirements. Please see <a href="#">external photo.pdf</a>
5. The modular transmitter must be tested in a stand-alone configuration, i.e., the module must not be inside another device during testing.	The LM-WP210RB was tested in a stand-alone configuration via a PCMCIA extender. Please see <a href="#">conducted set-up photo.pdf</a> and <a href="#">spurious set-up photo.pdf</a>
6. The modular transmitter must be labeled with its own FCC ID number, and, if the FCC ID is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module.	The label position of LM-WP210RB is clearly indicated. Please see the <a href="#">label.pdf</a>
7. The modular transmitter must comply with any specific rule or operating requirements applicable to the transmitter and the manufacturer must provide adequate instructions along with the module to explain any such requirements. A copy of these instructions must be included in the application for equipment authorization.	The LM-WP210RB is compliant with all applicable FCC rules. Detail instructions are given in the Users Manual. Please see <a href="#">Installation guide.pdf</a>
8. The modular transmitter must comply with any applicable RF exposure requirements. For example, FCC Rules in Sections 2.1091, 2.1093 and specific Sections of Part 15, including 15.319(i), 15.407(f), 15.253(f) and 15.255(g), require that Unlicensed PCS, UNII and millimeter wave devices perform routine environmental evaluation for RF Exposure to demonstrate compliance. In addition, spread spectrum transmitters operating under Section 15.247 are required to address RF Exposure compliance in accordance with Section 15.247(b)(4).	The LM-WP210RB comply with applicable RF exposure requirements. Please see <a href="#">RF safety evaluation. pdf</a>

Yours sincerely,

Elton Chen
