

Cambium Networks

Sept 29th, 2016

To whom it may concern,

Cambium Networks is requesting Elite Engineering (TCB), file a change in identification with the FCC regarding FCC ID: Z8H89FT0025 per 2.933. This is a multi-layer Ethernet radio operating between 902 MHz to 928 MHz.

Original identification: PEJ-93829283-MSD9

Original certification date: July 31, 2013

Differs in external housing color: blue and labeled Cambium Networks (original Xetawave was green)

Original test results are still valid, representative and applicable to the product.

External photos have been submitted as well as the label.

Sincerely,

Steven M. Payne
R.F. Principle Staff Engineer
