

YICK SHUN ELECTRONIC TOYS MFY., LTD.
ER372 (MINI ANIMAL RC)

Circuit Description:

This unit is a low power remote control transmitter. Q3 is a crystal controlled oscillator. Transistors Q1 & Q2 forms a multivibrator circuit that keys the transmitter on and off. The unit operates in the 27 Mhz. RC Band . No voice or tone modulation is provided

ANTENNA AND GROUND CIRCUITRY

This unit makes use of a external 5" antenna. The antenna is inductively coupled. This unit is powered from a 9V battery.

No ground connection is provided. The unit relies on the ground tract of the printed circuit board.
