RE: SerComm Corporation

FCC ID: P27IP806MA

I have a few comments on this Application. Depending on your responses, kindly understand there may be additional comments.

- 1.) Please provide a Block Diagram of the mini-PCI card transmitter used with this equipment.
- 2.) Please provide a circuit schematic of the mini-PCI card transmitter used in this filing.
- 3.) Page 16 of the Manual (pp 19 in *.pdf version) seems to indicate that the end user is able to set the country region where this device can operate. This is not permitted under the Rules – end users cannot under any circumstances have access to any features that will allow this device to transmit on non-US frequencies. Please address.
- 4.) Information to user statements of 15.21 appear to be missing.
- 5.) Instructions for end users to maintain a 20cm distance from the transmitter appear to be missing.

William H. Graff
President and Director of Engineering

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
