Control Box	1
Cable Ties	24
Clip	14
Screw	28
User Manual	1

Specifications

Length	2*90cm + 2*120cm
Color	RGB
Control method	APP
Input	DC 12V

Instructions

1. Installation

- Open the package and spread the strip straight. Please check whether the strip light appearance and all parts are in good condition. Then power the strip light to test whether it could light normally. Fix the control box on engine compartment nearby vehicle battery with cable ties. (Notice: Beware of engine heat, please avoid high temperature component.)
- Clean the surface of the object where the strip needs to be installed and keep it dry. Any dust and liquid will affect the stickiness of 3M adhesive. The surface where the light adhere must be smooth and clean, otherwise the strip light will fall off.
- Tear off the adhesive tape, paste the strip on the correct place at once time. Install the clips with screws at the beginning and the end of the strip. (Notice: Do not move the strip light to other place after it is attached.)
- Press the strip firmly from the beginning to the end to remove the air from the strip and the surface of the object.
- Considering the gravity of the strip light itself and other influence, you can use cable ties on each section of the strip light to reinforce it. Screws can be used with clips to reinforce the strip installation.
- The installation is over, please connect the power with strip light. You can switch the light on/off and choose the color effect using the control box or APP. Enjoy your new strip light!

2. Download the "Govee Home" APP and add the device

a. Download APP

Search in Apple store (IOS) or Google Play (Android) to download Govee Home APP.

please visit: www.govee.com

b. Prepare to add device

Connecting power with the device to let the light on first, then open the bluetooth of your smart phone.

c. Add the device

Open the APP, when entering home page, click the icon "+" in the top right corner to enter Govee device list. Select H6185, then follow the APP prompt to add the device.

Warning

1. Please pay attention to anti-static during the installation and use of the product. Do not use sharp objects to touch the product, and avoid contact with strong chemicals such as strong acid and alkali.
2. When the product is installed, the bend should be avoided just in the position of the LED components, so as not to damage the product and affect the service life of the product.
3. There is no hidden nail or metal conductive object in the contact part between the lamp and the wall. If there is, remove or avoid the conductive object in advance to prevent unnecessary short-circuit of the light bar.

Customer Service

We are looking forward to provide the perfect services for you, and will pay attention to your feedback. Should you have any question, please give me the letter via support@govee.com

FCC STATEMENT

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.

Warning: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

1. Reorient or relocate the receiving antenna.
2. Increase the separation between the equipment and receiver.
3. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
4. Consult the dealer or an experienced radio/TV technician for help.
