Modification list (2nd upload) for FCC.pdf; 5WY8412 Modification list (2nd upload) for IC.pdf

Hi Mike,

1. Attached pls find Modification list (<-- cover letter) for FCC and IC.
2. Regarding the test set-up photo,

No we didn't use dipole antenna, we used Log-Periodic Antenna. I checked it, and found that our engineer took photo in front of the antenna mast and at the same height of Log antenna, so Log antenna looks like dipole antenna. We will take photo differently from next time.

Thanks and have a nice day.

Question #1: This is Class II permissive change filing. Please submit a cover letter to detail the modification has been made by comparing to the original device.

Question #2: Per the test setup photo, looks like you are using dipole antenna performing the radiated emission tests but report indicated the log-periodic antenna was used. Please confirm the type of antenna used as shown in the test setup photo.

Best Regards

Mike Kuo
