

Object: Request for changing an existing FCC ID: RI7HE910GL

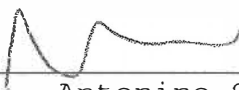

Date: 17/09/2017

Pursuant to CFR47 part 2.933(b) for a currently approved device, we, Telit Communications S.p.A, will establish a new FCC ID: RI7UE910GL under Telit Communications S.p.A. grant code for marketing purposes. The original grant will remain in effect. No changes to transmit power output, modulation or frequency have been made.

Therefore, the UE910-GL model can be considered to be electrically identical to the corresponding already assessed radio module HE910-GL and original test results are applicable and representative of this model.

New user manuals for these models have been developed, following the general formal of the certified models with the exact same FCC information.

Yours sincerely,

By: Antonino Sgroi
