

MAP-BTPRO▶▶▶▶ BLUETOOTH RECEIVER PRO

INTRODUCTION

MAP-BTPRO is designed to convert the Bluetooth signal from any compatible device such as a smartphone, laptop, tablet, or other mobile device. The unit provides two balanced XLR Line outputs and stereo RCA connectors on the rear panel. One 3.5mm TRS audio output on the front

panel, which allowing connect headphone or other compatible device directly. The output level can be adjusted by the VOLUME knob on the front panel. **MAP-BTPRO** is the perfect solution for converting Bluetooth audio into the professional audio system.

FEATURE

- * Converts Bluetooth signal to Analog audio outputs.
- * Provides XLR, RCA and 3.5mm outputs.
- * STEREO/MONO selectable operation mode.
- * Volume control on the front.
- * External antenna for long-range operation
- * Simple connection with professional audio system.
- * High quality of wireless connectivity and analog audio output.

APPLICATION

Personal, Commercial, Public address.

SPECIFICATIONS

Output Impedance:	100 Ohm RCA, 1/8"
	100 Ohm XLR
Output Connector:	Stereo XLR Line level output
	Stereo RCA and 1/8"Outputs
THD:	0.03%
S/N Ratio:	90 dB, unweight
Frequency Response:	20 Hz ~ 20 kHz, ±1.5Db
Bluetooth:	V5.1
POWER:	15 VDC / 500mA
Dimension:	171mm x 45mm x 74mm (WxHxD)
Weight:	0.52KG.

FCC Caution.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure Statement:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20 cm between the radiator & your body.

IC Warning

This device complies with Innovation, Science and Economic Development Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions:

- (1) This device may not cause interference, and
- (2) This device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR Innovation, Sciences et Développement économique Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes:

- (1) l'appareil ne doit pas produire de brouillage, et
- (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement

*RF warning for Mobile device:

This equipment complies with IC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

L'appareil a été évalué pour répondre aux exigences générales d'exposition aux RF. Cet équipement doit être installé et utilisé avec une distance minimale de 20 cm entre le radiateur et votre corps.
