

Tractive Dog XL Safety Information

Model: TG4XL

Tractive Dog XL Safety Information

ELECTROMAGNETIC COMPATIBILITY

Strong electromagnetic fields can potentially interfere with GPS signals and impact the performance of your Tractive Dog XL device. Interference from electromagnetic fields can disrupt the reception of the GPS signal and result in reduced accuracy or loss of device functionality.

RISKS FOR CHILDREN AND PEOPLE IN NEED OF CARE

The use of this device is not intended for people (including children) with limited physical, sensory or mental abilities or lack of experience and/or lack of knowledge, unless they are supervised by a person responsible for their safety or have been instructed on the use of the device. *Note: Some countries, states or regions have laws related to location based tracking of people, animals and objects. It's the sole responsibility of the owner and user to abide by the law and rules in the area the Tractive Dog XL device is used. Please switch off the Tractive Dog XL tracker before boarding a plane.*

SAFETY ADVICE

Important: Although the Tractive Dog XL device is small in size, it might be too large or heavy for small or injured pets. If you are unsure whether you can use this device with your pet, we highly recommend consulting a pet doctor or veterinarian. Do not disassemble or modify the device in any way. Opening the device can lead to exposure to hazardous materials and may cause injury. Extreme conditions, such as high temperatures or high humidity, can damage the device or impact the device's performance. In the event of any malfunctions, promptly contact Tractive GmbH for assistance.

BATTERY OPERATION

Your Tractive Dog XL tracker is operated by a rechargeable lithium-ion polymer battery.

- Use only chargers provided by Tractive GmbH or those specifically approved for use with lithium-ion polymer battery.
- Do not leave the battery connected to the charger for extended periods once it is fully charged. Overcharging can lead to overheating and reduce the battery's lifespan.
- Avoid exposing the battery to extreme temperatures. High temperatures can lead to overheating, while low temperatures can affect the battery's performance.
- Protect the battery from physical damage. Avoid dropping, puncturing, or otherwise subjecting the battery to impact, as this can lead to a leakage of electrolyte or other safety hazards.
- Charge the battery in a well-ventilated and open area. Avoid charging the battery near flammable materials. If you notice any unusual behavior such as excessive heat or swelling, stop charging immediately.

Check the model number on the backside of your tracker:

- **TG4XL:** Do not charge your tracker below +10 °C (32 °F) and above +45C (113 °F).

DISPOSAL

The crossed-out wheeled-bin symbol on your product, battery, literature or packaging reminds you that all electronic products and batteries must be taken to separate waste collection points at the end of their working lives; they must not be disposed of in the normal waste stream with household garbage. It is the responsibility of the user to dispose of the equipment using a designated collection point or service for separate recycling of waste electrical and electronic equipment (WEEE) and batteries according to local laws. Proper collection and recycling of your equipment helps ensure electrical and electronic equipment (EEE) waste is recycled in a manner that conserves valuable materials and protects human health and the environment, improper

handling, accidental breakage, damage, and/or improper recycling at the end of its life may be harmful for health and environment. For more information about where and how to drop off your EEE waste, please contact your local authorities, retailer or household waste disposal service.

FCC Compliance Statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation. The full text of Supplier's Declaration of Conformity can be viewed on our website: www.tractive.com/doc

The full statement of conformity for your model can be viewed on our website: www.tractive.com/doc

Check the backside of your tracker to see your model number.

EU Declaration of Conformity

Directive 2014/53/EU:

Short text of the Declaration of conformity: Tractive GmbH hereby declares that the Tractive Dog XL device conforms to the fundamental requirements and other relevant provisions of directive 2014/53/EU.

The device complies with EU SAR specifications when the device used at 0cm from your body.

This product is allowed to be used in all EU member states. The full statement of conformity for your model can be viewed on our website: www.tractive.com/doc

Check the backside of your tracker to see your model number.

ISED Canada compliance statement

This device contains licence-exempt transmitter(s)/receiver(s) that comply with Innovation, Science and Economic Development Canada's licence-exempt RSS(s).

Operation is subject to the following two conditions:

- (1) This device may not cause interference.
- (2) This device must accept any interference, including interference that may cause undesired operation of the device.

This Class B digital apparatus complies with Canadian ICES-003.
CAN ICES-003(B) / NMB-003(B)

Go to tractive.com/doc for additional information on your model.
Check the backside of your tracker to see your model number.

Technical Information

Function	Frequency Bands	Max. RF Output Power
GPRS 850/900	TX/RX: GSM 850 MHz, E-GSM 900 MHz	33 dBm
GPRS 1800/1900	TX/RX: DCS-1800, PCS-1900	30 dBm
LTE Cat M1	TX/RX: 1, 2, 3, 4, 5, 8, 12, 13, 20, 28	23 dBm
ISM	TX/RX: 2402 2480 MHz	20 dBm
GPS	RX: 1559 – 1610 MHz	
Wi-Fi	RX: 2.4 – 2.4835 GHz	

FCC&ISED Statement

This device complies with Part 15 of the FCC Rules and with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions:

(1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Cet appareil est conforme à la partie 15 des règles de la FCC et aux normes RSS exemptées de licence d'Industrie Canada. Le fonctionnement est soumis aux deux conditions suivantes: (1) cet appareil ne doit pas causer d'interférences nuisibles, et (2) cet appareil doit accepter toute interférence reçue, y compris les interférences pouvant entraîner un fonctionnement indés.

Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device meets the exemption from the routine evaluation limits in section 2.5 of RSS 102 and compliance with RSS 102 RF exposure, users can obtain Canadian information on RF exposure and compliance.

Cet appareil est conforme à l'exemption des limites d'évaluation courante dans la section 2.5 du cnr - 102 et conformité avec rss 102 de l'exposition aux rf, les utilisateurs peuvent obtenir des données canadiennes sur l'exposition aux champs rf et la conformité.

This equipment complies with Canada radiation exposure limits set forth for an uncontrolled environment.

Cet équipement est conforme aux limites d'exposition aux rayonnements du Canada établies pour un environnement non contrôlé.

Specific Absorption Rate (SAR) information:

This Device meets the government's requirements for exposure to radio waves. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or health. FCC&ISED RF Exposure Information and Statement the SAR limit of USA (FCC&ISED) is 1.6 W/kg averaged over one gram of tissue. Device types: Device has also been tested against this SAR limit. This device was tested for typical body-worn operations with the back of the device kept 0mm from the body.

To maintain compliance with FCC RF exposure requirements, use accessories that maintain an 0mm separation distance between the user's body and the back of the device. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC&ISED RF exposure requirements, and should be avoided.

Informations sur le débit d'absorption spécifique (DAS) :

Cet appareil répond aux exigences du gouvernement en matière d'exposition aux ondes radio. Les lignes directrices sont basées sur des normes qui ont été élaborées par des organisations scientifiques indépendantes grâce à une évaluation périodique et approfondie d'études scientifiques. Les normes comprennent une marge de sécurité substantielle conçue pour assurer la sécurité de toutes les personnes, quel que soit leur âge ou leur état de santé. La limite de DAS des États-Unis (FCC&ISDE) est de 1,6 W/kg en moyenne sur un gramme de tissu. Types d'appareils : L'appareil a également été testé par rapport à cette limite DAS. Cet appareil a été testé pour des opérations corporelles typiques avec l'arrière de l'appareil maintenu à 0 mm du corps. Pour maintenir la conformité aux exigences d'exposition RF de la FCC, utilisez des accessoires qui maintiennent une distance de séparation de 0 mm entre le corps de l'utilisateur et l'arrière de l'appareil. L'utilisation de clips de ceinture, d'étuis et d'accessoires similaires ne doit pas contenir de composants métalliques dans son assemblage. L'utilisation d'accessoires qui ne satisfont pas à ces exigences peut ne pas être conforme aux exigences d'exposition RF de la FCC&ISDE et doit être évitée.
