

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the internal components of an EUT (Electronic Under Test) device. The device is open, revealing a green printed circuit board (PCB) with various electronic components, including a large black integrated circuit (IC) and several smaller components. The PCB is mounted within a black plastic housing. A black ruler is placed horizontally below the device, showing measurements in millimeters (mm) and centimeters (cm). The ruler is marked from 0 to 100 mm on the left and 0 to 10 cm on the right.
Solder Board-Component View 1	 A close-up photograph of the solder board component. The component is a green PCB with various electronic components, including a large black IC, a silver capacitor, and several smaller components. The component is mounted on a black PCB. A black ruler is placed horizontally below the component, showing measurements in millimeters (mm) and centimeters (cm). The ruler is marked from 0 to 100 mm on the left and 0 to 10 cm on the right.

Solder Board-Component View 4	 A photograph of a green printed circuit board (PCB) component, labeled 'BS1016-03A1 V2.0', positioned on a blue textured surface. The component is oriented vertically and features various electronic components, including a microcontroller, resistors, and a connector. A black ruler with white markings is placed horizontally below the component, showing measurements in millimeters (mm) from 0 to 100. The component's length is approximately 40 mm.
Solder Board-Component View 5	 A photograph of the same green PCB component, labeled 'BS1016A-03A1 V2.0', positioned on a blue textured surface. The component is oriented horizontally. A black ruler with white markings is placed horizontally below the component, showing measurements in millimeters (mm) from 0 to 100. The component's length is approximately 100 mm.
