RE: FCC ID: O6YUTS-702U

Attention: Rick McMurray / Kathy Grzovic

I have a few comments on this Application.

1. Please note that while EIRP power between the EMC and SAR report may sometimes be allowed to vary by several dB, in all cases the values measured in the SAR MUST be the higher value. Please note that the power in your EMC report is a maximum of 19.9dBm while the maximum reported in the SAR report is only 19.55dBm. Please retest and provide an EMC and SAR report comparison where the SAR report reports the higher of the two power levels.

Response: The EMC test report contained a typo. The actual EIRP is 19.4 dbm. We regret the error. Please review the revised test report uploaded with this response; a revised 731 Form has also been uploaded.
