Within the scope of national laws and regulations,</p>		<p>the right of interpretation and maintenance of this commitment belongs to YINUOLINK CO., LTD.</p> <p><small>*Maximum wireless signal rates are the physical rates derived from IEEE Standard 802.11 specifications. Actual wireless data throughput and wireless coverage are not guaranteed and will vary as a result of 1) environmental factors, including building materials, physical objects, and obstacles; 2) network conditions, including local interference, volume and density of traffic, product location, network complexity, and network overhead, and 3) AP limitations, including rated performance, location, connection quality, and AP condition.</small></p> <p><small>*Use of MU-MIMO requires your APs to also support MU-MIMO.</small></p> <p><small>*Numbers are based on testing conducted by the USB-IF and your computers are required to also support USB 3.0</small></p> <p><small>*To ensure compatibility, you may need to update the adapter's drivers after an OS update. Actual network speed may be limited by the rate of the product's Ethernet WAN or LAN port, the rate supported by the network cable, Internet service provider factors and other environmental conditions.</small></p>		<p>Federal Communication Commission (FCC) Radiation Exposure Statement :</p> <p>The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. Device types Y9(FCC ID:2A66J-Y9) has also been tested against this SAR limit.This device was tested for typical body-worn operations with the back of the handset kept 5mm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 5mm separation distance between the user's body and the back of the handset. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure</p>		<p>requirements, and should be avoided. This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.</p> <p>NOTE: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications or changes to this equipment. Such modifications or changes could void the user's authority to operate the equipment.</p> <p>NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are</p>		<p>designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:</p> <p>- Reorient or relocate the receiving antenna.</p> <p>- Increase the separation between the equipment and</p>		<p>receiver.</p> <p>-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.</p> <p>-Consult the dealer or an experienced radio/TV technician for help.</p> <p>FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.</p>
