Correspondence Reference No.: 21784
Request for Tech. Info.: 1/18/02

Dear Andy:

Transmitted herewith, on behalf of Symbol Technologies, Inc., is an amendment provided in response to the request for technical information dated January 18, 2002.

1. Please find the attached Z-axis scan plots.
2. Please find the attached certified conversion factors for all tissue parameters.
3. Please find the attached revised pages 14 and 15 of the SAR report containing the liquid temperatures during all tests and validations.
4. Please note that the conductivity used during the test is higher than the conductivity specified by Supplement C. This will lead to an overestimation of the SAR value.
5. We confirm that the phantom used is 2 mm thick.
6. Please note that the SAR power measurements were radiated. The difference of 2 dB is due to the 2 dBi gain of the antenna.

We trust this information is sufficient to issue the grant as soon as possible. If you have any further questions, please do not hesitate to contact us.

Randy Ortanez
President
