Hello Tim,

Go ahead and list, assuming compliance is met, the tunable frequencies(center frequency of the lowest channel to center frequency of highest channel) in the PC. This will resolve any questions about the actual frequencies.

Thank you for your diligence.

**Subject:** Concern with previous Grant during our PC review  
**Importance:** High

To Whom It May Concern,

We are processing a Permissive Change application where we have noted that the original grant lists 2400-2483.5 MHz instead of actual frequencies (see attached). Our understanding is that under Part 15, the FCC wants actual tunable frequencies. Please review.

Thanks,
