Re: FCC ID PU5MS2133  
Applicant: Wistron Corporation  
Correspondence Reference Number: 25869  
731 Confirmation Number: EA459937

1) Please update the user manual RF exposure statement. The location reference "is installed on the corner of the bottom of the LCD display." does not appear to agree with locations shown on the photograph. Mention of the blue tooth transmitter is not made. Also, please include an appropriate "no collocation" statement.

**Response: Revised sections of the manual have been uploaded with the changes that were requested to be included. Changes were made to page 18 of 27.**

2) New reply to crn 25759 #1 =exhibit "SAR CRN25759" still does not seem correct. Questions that were answered and numbering do not match crn 25636, same as was explained in 25759. Especially 25636 2, 4, 5, 9 answers not found. Please re-format so that correct answers go with correct questions and numbers for this filing, and remove any replies that apply only to EA859241.

**Response: CRN25636 replies with questions for 2, 4, 5, and 9 are included now. All reference to EA859241 has been removed.**

If you need further information or clarification please do not hesitate to contact us via [doc@elliottlabs.com](mailto:doc@elliottlabs.com).

Regards

Juan Martinez
