

ser Manual Model

No.: V4E6N2

Included In-Box:

- Device (model no. V4E6N2)
- AC/DC Power Adapter

Description:

The device is a sleep tracker based on 60GHz radar technology that is operational while placed on the bedside of the user (nightstand) and power supplied via AC/DC power adapter. In addition, the device is equipped with 2.4 and 5GHz WiFi and Bluetooth for set-up and internet connection and with a wake lamp.

Installation and Operation:

Place the device on a flat, free and stable surface on your bedside (nightstand) with a minimum distance of 20cm towards your body. Plug in the DC connector of the AC/DC power adapter. Plug-in the AC/DC adapter into a nearby AC outlet.

For set-up please follow instructions on the Quick Start Guide. Please adhere to safety guidance below and on the product website.

Safety and Compliance Information Using Your Device Around Other Electronic Devices

The Device, uses, and can radiate radio frequency (RF) energy and, if not used in accordance with its instructions, may cause interference to radio communications and electronic equipment. External RF signals may affect improperly installed or inadequately shielded electronic operating systems, entertainment systems, and personal medical devices.

While most modern electronic equipment is shielded from external RF signals, if in doubt, check with the manufacturer. For personal medical devices (such as pacemakers and hearing aids), consult with your physician or the manufacturer to determine if they are adequately shielded from external RF signals.

There are some places where RF signals could constitute a hazard, such as health care facilities, and construction sites. If you are not sure, look around for signs indicating that two-way radios or mobile phones should be turned off.

FCC Compliance Information

Electromagnetic Interference Compliance Statement and Notes

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: —Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Note: Changes or modifications that are not expressly approved by the party responsible for compliance could make the device no longer comply with the FCC Rules.

Device FCC Radio Certification Information

Information on your device is on file with the FCC Equipment Authorization System and can be found by inputting your device's FCC ID, which can be found on the back of Device, into the FCC ID Search form available at transition.fcc.gov/oet/ea/fccid.

Information Regarding Exposure to Radio Frequency (RF) Energy

The device operates with low radio frequency transmission power which safely meets the FCC RF exposure limits. This device should be installed as intended and instructed to meet the recommended minimum distance of 20 cm towards the user.

Product Specifications

Electrical ratings: AC/DC power adapter. AC: 100-240VAC, 50/60Hz; DC: 13.5VDC Max 1.14A

Connectivity: Dual Band Wi-Fi (2.4/5 GHz); 802.11 a/b/g/n; BT, BLE

Operating temperature: 0°C to 35°C

Operating Frequency and Maximum Radio Frequency Power (EIRP):

BT (2402-2480 MHz: 6.5 dBm)

BLE (2402-2480 MHz: 7 dBm)

Wi-Fi 2.4 GHz (2412-2472 MHz: 19 dBm)

Wi-Fi 5G (5180-5240 MHz: 15 dBm)

Wi-Fi 5G (5620-5320 MHz: 16 dBm)

Wi-Fi 5G (5500-5700 MHz: 16 dBm)

Wi-Fi 5G (5745-5825 MHz: 16 dBm)

Non-ISM band 62-63.1 GHz: 3 dBm

ISM band 61-61.5 GHz: 20dBm
