Specifications
Power: 10 W
Voltage: 12V AC/DC
Current: 0.83A
Power Input: 24V / 10A-100W
IR Remote: 1000Hz or 38KHz
IR Remote: 1000Hz or 38KHz
Remote Battery: CR2032 (3V Lithium Coin)

Light Strip Setup

- Choose smooth and hard surfaces in vehicle to mount LED strips. Smooth, plastic and metal are ideal mounting surfaces.
- Position LED strips around vehicle to maximize power cables with nearby mounting locations. There are 2 shorter cables for front of cabin and 2 longer cables reach to rear.
- Run cables in locations that do not interfere with vehicle or seat operation.
- Carefully peel off adhesive backing without removing clear adhesive layer. Adhesive layer is very thin, clear and can come off inadvertently while removing backing.
- Apply pressure while sticking LED strip.
- Connect USB plug to 12V / 2A USB power source or 12V power outlet with included power cables.

Caution: For the best results and long-lasting adhesion, please use a 12V plug with more time to carefully remove finger that when strip is placed onto strip is securely attached to mounting surface. Ready removal to the wire and we will be pleased to replace anything about.

NO LEADING, SHARP EDGES OR BURNING HOT. THIS IS A NON-FLAMMABLE LED STRIP.

Sound Reactive Remote Control

- Make lights dance to the music!
- Remove plastic battery protection from remote control prior to use.
- Point remote to avoid light that is already active and press On button to test.
- Remote controls lights up to 30 feet away. Make sure to point remote at IR sensor on light and that there is clear line of sight.
- Choose colors, adjust brightness level or select preset color or color flow light modes.
- Press music button for sound reactive mode that makes lights change colors to sound.
- Place remote less than 20 inches away from speaker or other sound source and less than 30 feet away from lights with clear line of sight.

Scan the QR code or visit the Smart Life App for your iOS or Android. (App available for free download from the App Store or Google Play)

Connecting Smartphone

- Download Smart Life App from App Store or Google Play.
- Allow App access. You may choose to register or continue as guest.
- Connect light strip to USB power source. Press and hold button on controller until light strip starts flashing.
- Tap + in upper right to add device.
- Discovering device the with quick Add button will automatically appear in upper corner area if light is flashing in pairing mode and device is discoverable.
- Tap Add button to connect automatically.
- Follow prompts in App to connect and proceed to home screen.
- Select Strip Lights. Lights can connect via Bluetooth.
- Make sure pairing light strip and smartphone are nearby.

Now you can Bluetooth® enabled smartphone to control music.
