Re: G8JMMI01

To Whom it May Concern:

The device originally certified by FCC ID G8JMMI01 approval granted 3/26/1999 and a Class II Permissive change granted on 4/3/2002 has been modified as described:

The original device's enclosure(PN-52860P008) had become obsolete by the supplier. A new enclosure (PN-52860P200) had to be selected to house the original circuitry and PCB's (printed circuit board assemblies). The original device's schematics have not changed, the new enclosure necessitated length and routing changes to the device's wiring. The original device's operational description, block diagrams, antenna information, tune-up / alignment procedures, and user manual remain unchanged.

The parts list has changed to reflect the new enclosure and necessary revisions of the wiring diagram.

Sincerely,

A handwritten signature in dark ink, appearing to read "Thomas J. Wack", with a stylized flourish at the end.

Thomas J. Wack
Sr. Digital/Analog Engineer
