Solder Board-Component View 4	 A photograph of a small, black, rectangular electronic component, likely a solder mask or a small PCB, placed on a blue textured surface. The component has several small circular holes and some text printed on it, including "LOCKLY" and "M/JB-D". A black L-shaped ruler with white markings in millimeters is positioned next to the component for scale. The ruler shows measurements from 0 to 100 mm on both the horizontal and vertical axes.
Solder Board-Component View 5	 A photograph of the same small, black, rectangular electronic component, viewed from a different angle (View 5). The component is placed on the same blue textured surface. A black L-shaped ruler with white markings in millimeters is positioned next to it for scale, showing measurements from 0 to 100 mm on both the horizontal and vertical axes. The component's features, including the "LOCKLY" text and circular holes, are visible from this perspective.

Solder Board-Component View 8	 A photograph of a small green printed circuit board (PCB) component, likely a Z-wave antenna, placed on a blue textured surface. A black ruler with white markings is positioned vertically to the left of the component, showing measurements in millimeters. The component is rectangular with a black square in the center and several gold-colored solder points around the perimeter.
Antenna View 1	Zwave Antenna  A photograph of a silver-colored electronic device, possibly a remote control, with its back cover removed, revealing internal components. A red rectangular box highlights a section of the device's internal circuitry, which includes a Z-wave antenna. A red line points from the text "Zwave Antenna" to this highlighted area. The device has a black plastic back cover with a silver-colored metal frame. The internal components are visible through a clear plastic window. The device is placed on a blue textured surface.
