STEP 5 Quick Dimming / Color Change

Dim — Brighten
Warm White — Cool White

Press and Hold ≥2s

- You can simply press and hold button 1/2 (≥2s) to dim/brighten the lights in the room, or press and hold the button 3/4 (≥2s) to tune the color temperature to warm white / cool white.
- **NOTE**: The quick dimming / color change operations are only effective for lights which are already turned on.

▌ Important Notices

- For wall-mounting use, ONLY stick the back cover to flat surface to avoid dropping.
- If the battery is low, button 1 will flash once when any button is pressed. You should change the battery asap.
- The use of App doesn't require creation of account for simplest experience. We still highly recommend users to create account so when you change a phone and log in with same account, everything will be automatically synced without setting up again.

▌ Frequently Asked Questions

- Why we need to long press the button combination to save changes?
  For battery saving, the scene switch is "sleeping" most of time and will be triggered to wake up only when it is pressed for communication – this is a common design for battery powered sensors.

▌ What's Required

Smart Phone

FastCon BLE lights

CR2430 Battery

- A smart phone or tablet running iOS 11.0 / Android 5.1 or higher with Bluetooth turned on.
- FastCon BLE enabled lights.
- Insert a CR2430 cell battery (not included in package) to power the device.

STEP 1 Install APP

- Scan the QR code or search "BroadLink BLE" in App Store or Google Play to download and install the free App.
- Account creation is not mandatory to use the App. However, as an option, you can go to "Me" tab to create your account for syncing data between different mobile devices.

STEP 2 Add Device

Add Device
Light / Panel / Curtain / Sensor / Gateway

Hold 4s to reset
Pairing status last for 10s

Add Devices

- Tap "Add Device" > "Scene Switch" > "Add Devices" to let the App scan devices to be paired.
- Press and hold buttons 1&4 or 2&3 for 4s to reset the device until all LEDs are flashing. Then wait for the device to be discovered automatically in the App. You can rename the device and tap "Done" to complete pairing.

STEP 3 Use Preset Scenes

My home ▾   +
All Living room Master bedroom ☰

BUTTON 1 Back Home
BUTTON 2 All OFF
BUTTON 3 Bright
BUTTON 4 Movie
Soft
Read

- The scene switch is ready-to-use after pairing. The 4 buttons match the first 4 scenes preset in the room which the switch is assigned.
- Now you can just press and activate the scenes from the buttons.

STEP 4 Change Scene Setting

< Scene Switch
Select Button
Button 1 ✓

Wake up device to save

Saving ✓

Save

- You can tap the "⋮" to edit the scene (ex. Change another button to activate the scene or associate a new scene to a button).
- Tap "+ Add Trigger" and choose scene switch and button.
- Then tap "Save" and wake up the device again with long pressing the button combinations to save the change.
