**COLUMBIA MD 21046**

To Whom It May Concern

This is to request that all schematics associated with the BSI 2000 and inFOREmer 2000 remain confidential. These products are pioneering a new application of GPS in the market place, and as we near product release, we feel that confidentiality is required in order to protect our market position at this sensitive time.

Regards,

Gary Zywiecki  
**Director of Engineering**
