A black Harman International MT-60-91 stereo amplifier is shown from a top-down perspective. The device has a rectangular shape with rounded corners and a matte black finish. It features two main channels, each with a volume knob and a tone knob. There are also input jacks for various sources like CD, FM, and AM. The front panel is densely packed with controls, including several smaller knobs and switches. Two wooden rulers are placed horizontally in front of the amplifier to provide a sense of scale. The ruler on the left shows measurements from 15 to 30 centimeters, while the ruler on the right shows measurements from 16 to 34 centimeters. The background is a light blue surface.
