Modular Approval Request

FCC ID: VPYLB2DU

The following attestation addresses the requirements to support modular approval:

Modular approval requirement	**Yes (provide brief statement)**	**No ***
(a) The radio elements must have the radio frequency circuitry shielded. Physical components and tuning capacitor(s) may be located external to the shield, but must be on the module assembly	Yes There is shielding coating outside the resin mold of the module.	
(b) The module must have buffered modulation/data inputs to ensure that the device will comply with Part 15 requirements with any type of input signal	Yes The data buffering is implemented by the IC inside.	
(c) The module must contain power supply regulation on the module	Yes The power regulation is implemented by the IC inside.	
(d) The module must contain a permanently attached antenna, or contain a unique antenna connector, and be marketed and operated only with specific antenna(s), per Sections 15.203, 15.204(b), 15.204(c), 15.212(a), 2.929(b)	Yes The antenna meets the antenna requirements.	
(e) The module must demonstrate compliance in a stand-alone configuration	Yes	
(f) The module must be labelled with its permanently affixed FCC ID label, or use an electronic display (See KDB Publication 784748 about labelling requirements)	Yes Since the size of module is small, the FCC ID is printed on the package and user manual.	
(g) The module must comply with all specific rules applicable to the transmitter. The grantee must provide comprehensive instructions to explain compliance requirements	Yes	

Modular approval requirement	Yes (provide brief statement)	No *
(h) The module must comply with RF exposure requirements	Yes	

* Please provide a detailed explanation if the answer is “No.”

Sincerely,

Signed: K. Hayashikoshi
