Solder Board-Component View 6	 A photograph of a small green printed circuit board (PCB) component. The component has several gold-colored solder pads and a small white connector with two red and black wires. It is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component positioned between the 10mm and 60mm marks.
Solder Board-Component View 7	 A photograph showing two views of a component. On the left is a black, cylindrical component with a silver-colored metal ring. On the right is a silver-colored metal component with a circular opening and four small blue solder pads. Both components are placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the components positioned between the 10mm and 100mm marks.

Solder Board-Component View 10	 A photograph of a small, irregularly shaped electronic component, likely a solder mask or a small PCB, placed on a blue textured surface. The component is dark with some gold-colored solder points. It is positioned next to a black ruler with white markings. The ruler shows measurements in millimeters (mm) from 0 to 70. The component is approximately 20 mm wide and 10 mm high.
Solder Board-Component View 11	 A photograph of the same electronic component from a different angle, showing the underside. The component is dark with some gold-colored solder points. It is positioned next to a black ruler with white markings. The ruler shows measurements in millimeters (mm) from 0 to 70. The component is approximately 20 mm wide and 10 mm high.

Solder Board-Component View 1	 A photograph of a green printed circuit board (PCB) component, labeled 'Solder Board-Component View 1'. The component is rectangular with a central integrated circuit (IC) and various surface components. It is placed on a blue textured background. A black ruler with white markings is positioned horizontally below the component, showing measurements in millimeters (mm) from 0 to 100. A vertical ruler is also visible on the left side of the component, showing measurements from 0 to 90 mm.
Solder Board-Component View 2	 A photograph of a green printed circuit board (PCB) component, labeled 'Solder Board-Component View 2'. The component is rectangular with a central integrated circuit (IC) and various surface components. It is placed on a blue textured background. A black ruler with white markings is positioned horizontally below the component, showing measurements in millimeters (mm) from 0 to 100. A vertical ruler is also visible on the left side of the component, showing measurements from 0 to 90 mm.

Solder Board-Component View 3	 A photograph of a green printed circuit board (PCB) with various electronic components, including a large black integrated circuit (IC) in the center, several resistors, and capacitors. The board is placed on a blue textured surface next to a black ruler with white markings. The ruler shows dimensions in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The board has a circular cutout in the center and several mounting holes.
Solder Board-Component View 4	 A photograph of the same green PCB from a different angle, showing the underside or a different side. It features a large blue electrolytic capacitor, a black IC, and other components. The board is placed on the same blue surface next to the same black ruler. The ruler shows dimensions in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The board has a circular cutout in the center and several mounting holes.

Solder Board-Component View 5	 A photograph showing a small, circular electronic component (likely a microcontroller or sensor) mounted on a blue textured surface. The component is positioned next to a black ruler with white markings, which indicates its size. The ruler shows measurements in millimeters (mm) and centimeters (cm).

Solder Board-Component View 7	 A photograph of a small, irregularly shaped electronic component, likely a solder mask or a small PCB, placed on a blue textured surface. The component is dark with some gold-colored solder points. It is positioned next to a black ruler with white markings. The ruler shows measurements in millimeters (mm) from 0 to 70 and centimeters (cm) from 10 to 60. The component is approximately 20 mm wide and 10 mm high.
Solder Board-Component View 8	 A photograph of the same electronic component from a different angle, showing the underside. The component is dark with some gold-colored solder points. It is positioned next to a black ruler with white markings. The ruler shows measurements in millimeters (mm) from 0 to 70 and centimeters (cm) from 10 to 60. The component is approximately 20 mm wide and 10 mm high.
