| <b>EUT Housing and Board<br/>View 1</b>      |  A photograph showing the internal components of the EUT housing. The housing is open, revealing a black plastic casing and a white printed circuit board (PCB) with various electronic components. A yellow battery is visible. The assembly is placed on a blue textured surface next to a metal ruler for scale. The ruler shows centimeters from 1 to 15 and millimeters from 0.5 to 15.                            |
| <b>Solder<br/>Board-Component View<br/>1</b> |  A close-up photograph of a small, rectangular printed circuit board (PCB) component. The board is populated with various electronic components, including resistors, capacitors, and integrated circuits. A red wire is soldered to one of the components. The component is placed on a blue textured surface next to a metal ruler for scale. The ruler shows centimeters from 1 to 8 and millimeters from 0.5 to 8. |

|                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|--------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <div>Solder<br/>Board-Component View<br/>2</div> |  A photograph of a small, rectangular electronic component, likely a microcontroller or sensor, mounted on a blue textured surface. The component is positioned between two rulers. The vertical ruler on the left shows a scale from 1 to 8 cm. The horizontal ruler at the bottom shows a scale from 1 to 8 cm, with a 0.5 mm scale visible. The component has a red wire extending from its right side.                   |
| <div>Solder<br/>Board-Component View<br/>3</div> |  A photograph of a rectangular electronic component, possibly a battery or a small PCB, mounted on a blue textured surface. The component is positioned between two rulers. The vertical ruler on the left shows a scale from 1 to 10 cm. The horizontal ruler at the bottom shows a scale from 1 to 10 cm, with a 0.5 mm scale visible. The component has two wires, one red and one black, extending from its right side. |
