

MODULAR APPROVAL LETTER

FCC ID: ZMOMC610LA20

Modular Approval Requirement	Yes
(i) The radio elements of the modular transmitter must have their own shielding. The physical crystal and tuning capacitors may be located external to the shielded radio elements.	Yes, please see exhibition external photos
(ii) The modular transmitter must have buffered modulation/data inputs (if such inputs are provided) to ensure that the module will comply with part 15 requirements under conditions of excessive data rates or over-modulation.	Yes, the modular has buffer modulation/data inputs
(iii) The modular transmitter must have its own power supply regulation.	Yes, please see the schematics
(iv) The modular transmitter must comply with the antenna and transmission system requirements of §§ 15.203, 15.204(b) and 15.204(c). The antenna must either be permanently attached or employ a "unique" antenna coupler (at all connections between the module and the antenna, including the cable). The "professional installation" provision of § 15.203 is not applicable to modules but can apply to limited modular approvals under paragraph (b) of this section.	Yes, the requirements of antenna connector and spurious emission have been fulfilled. Please refer to the test report.
(v) The modular transmitter must be tested in a stand-alone configuration	Yes, please refer to the setup photos
(vi) The modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number.	Yes, the module will be label with it own FCC ID, and the instruction on the labeling rule of the end product has been stated in the user manual of this module.
(vii) The modular transmitter must comply with any specific rules or operating requirements that ordinarily apply to a complete transmitter and the manufacturer must provide adequate instructions along with the module to explain any such requirements. A copy of these instructions must be included in the application for equipment authorization.	Yes, the required FCC rule has been fulfilled and all the instruction for maintaining compliance have been clearly stated in the user manual
(viii) The modular transmitter must comply with any applicable RF exposure requirements in its final configuration.	Yes, please refer exhibition RF exposure of MPE RF exposure rule.
