A black plastic smartphone chassis is shown next to a ruler for scale. The chassis has a central rectangular cutout and various mounting points. A SIM card is inserted into a slot on the left side, with a small white label that reads "8128 2014 SS". A small electronic component is mounted on the top edge. The ruler is marked in centimeters and inches, with "100" and "50" visible. The text "STAINLESS STEEL" is also visible on the ruler.

A black plastic smartphone chassis is shown lying flat on a light-colored wooden surface. A stainless steel ruler is placed vertically to the left of the chassis for scale. The ruler has markings in centimeters (0 to 10) and inches (0 to 4). The chassis features a large rectangular cutout in the center, likely for a screen. To the right of this cutout is a battery compartment with a white label. The label contains the following text: "IMEI 1: 352798070527296", "IMEI 2: 352798070527274", a barcode, "CE", a crossed-out recycling symbol, and "ACC ID: 00000 0000000". Below the battery compartment is a small square component, possibly a camera lens or sensor. The chassis is secured with several screws, including a prominent gold-colored one at the top right.
