Radio frequency transmitter

Type

FS14T
FS14TK

General:

The FS14 is a transmitter designed to provide remote keyless entry, passive entry, passive engine start, and immobilization functionality.

Within the housing is applied an inner container, containing a lower container and container cover which are laser welded. Within the container is placed a PCB, which is the same type for all variants and containing a different number of switches.

Owner Manual Information:

USA:

FCC ID:KR5VWFS14TK

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
