FCC ID: PUU-CWLMSNNWW1

Dry location only. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Any changes or modifications not expressly approved by the manufacturer could void the user's authority to operate the equipment. NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: reorient or relocate the receiving antenna, increase the separation between the equipment and receiver, connect the equipment into an outlet on a circuit different from that to which the receiver is connected, or consult the dealer or an experienced radio/TV technician for help.

This device complies with CAN ICES-3(B)/NMB-3(B) RF Exposure Information: This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. In order to avoid the possibility of exceeding the FCC

radio frequency exposure limits, human proximity to the antenna shall not be less than 8 inches during normal operation.

RF Exposure Statement: This equipment complies with ISED RSS-102 radiation exposure limits set forth for an uncontrolled environment. This transmitter must be installed to provide a separation distance of at least 8 inches from all persons and must not be collocated or operating in conjunction with any other antenna or transmitter.

This device contains licence-exempt transmitter(s)/receiver(s) that comply with Innovation, Science and Economic Development Canada's licence-exempt RSS(s). Operation is subject to the following two conditions:

1. This device may not cause interference.
2. This device must accept any interference, including interference that may cause undesired operation of the device.

Cet équipement est conforme aux limites d'exposition aux rayonnements de la ISED établies pour un environnement non contrôlé. Cet équipement doit être installé et fonctionner à au moins 20 cm de distance d'un radiateur ou de votre corps.

L'émetteur/récepteur exempt de licence contenu dans le présent appareil est conforme aux CNR d'Innovation, Sciences et Développement économique Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes :

1. L'appareil ne doit pas produire de brouillage;
2. L'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

Wireless Motion Smart Sensor Installation Guide

PK-00102099-1

Installing Sensor	Battery Replacement	Sensor Set Up	Discover What Your Wireless Smart Sensor Can Do:
Recommended Tools Phillips Screwdriver, Drill w/ 7/32 bit, Tape Measure Screw Mount 1. Before installing, remove plastic battery tab 2. Identify where you want to mount your wireless sensor (recommend placing between 66-78" from the floor) 3. Mark the location for hole to be drilled 4. Using 7/32" bit, drill hole in wall for mounting screw, insert anchor 5. Remove magnetic mount from bracket, screw the bracket into the wall until flush, then replace magnetic mount in the bracket 6. Mount sensor at desired angle Freestanding 1. Motion sensor can either be placed vertically or horizontally with the use of the included magnetic mount. 2. Identify where you want to place your wireless motion sensor. Any level shelf or surface is an ideal location for your sensor 3. Install motion sensor and rotate to ideal angle .	1. Remove sensor from mounting bracket. 2. Slide the back cover up then outward to remove rear housing of the sensor. 3. Remove old batteries. 4. Install two new AAA batteries inside the bracket. 5. Replace back cover. 6. Replace sensor. Access battery from back of sensor	Press Wake Button on the side of Wireless Sensor to initiate setup. LED indicator light on front of sensor will flash blue until app setup is complete. Download the C by GE app Add Wireless Sensor to the C by GE app Place your Wireless Sensor in the same room in the app as the C by GE Smart Lights, Plugs, and Switches that you want to motion control. For installation help, visit cbyge.com.	① Turn off bathroom lights when unoccupied. Go to C by GE app. Add Wireless Sensor and Smart Switch to a room under create a room. Enable motion sensor under room motion sensor. (switch sold separately) ② Turn on entryway lights when you arrive home. Go to C by GE app. Add Wireless Sensor and Smart Light to a room under create a room. Enable motion sensor under room motion sensor. (lights sold separately) ③ Turn on your desk fan automatically when you enter a room. Go to C by GE app. Add Wireless Sensor and Smart Plug to a room under create a room. Enable motion sensor under room motion sensor. (plug sold separately)
