

Litenna™

In-Building RF Distribution System

- Compliant with all existing wireless voice and data services: TDMA, CDMA, GSM
- Supports GPRS, EDGE, CDPD and WAP technologies
- Easily upgradeable from single band to multi band and future services-3G
- Single infrastructure for multiple services / multiple operators
- Built-in alarms and monitoring for all links
- Singlemode fiberoptic cables connect between the system units
- Easy to design, install and maintain

The Litenna™, fiberoptic based distribution system, enables wireless service operators and integrators to provide seamless coverage and enhanced cellular capacity for In-building applications. Comprised of a Base Unit that connects up to eight Remote Hub Units (driving up to four antennas each), the fiberoptic technology based system is modular and expandable to a wide variety of structure sizes and configurations. The Litenna supports wireless voice and data applications, offering a cost-effective and flexible solution for coverage enhancement.

Absolute Maximum Rating

Specifications	Base Unit	Remote Hub Unit
Total Input RF Power - No Damage (dBm)	20 (Down Link)	10 (Up Link)
Power Supply (VDC)	60	60
Operating Temperature (°C) ¹	0 to + 50	0 to + 50
Storage Temperature (°C)	-20 to + 85	-20 to + 85

1. For extended temperature range (-20 to 60°C) contact Foxcom Wireless.

Fiber Optic Specifications

Optical Specifications	
Optical output power (mW)	≤3.0
Max. Optical budget (dB)	1.5
Optical loss per mated pair connectors (dB)	0.5 maximum
Optical Connector	SC/APC
Fiber type	9/125 single mode
Wavelength (nm)	1310±10

General Specifications

Specifications	Base Unit	Remote Hub Unit
Power	20-48VDC 10W max. Base Unit 8 ports 5W max. Base Unit 4 ports	20-48VDC - DC input or: 27-48VDC - fed through composite cable 18 W max. Singleband 24 W max. Dualband
Dimensions	19" x 1U Wallmount / Rackmount	11"W x 8"L x 2"H
RF Connector	N Type Female, Impedance 50 Ω	N Type Female, Impedance 50 Ω
Weight(Kg)	2.3	1.2
Other Specifications		
Distance between BU and RHU (m) DC power is supplied via composite cable @19AWG(¹) DC power is supplied via copper @ 12AWG(¹)	500 @ 48VDC 2000 @ 48VDC	
MTBF (Hrs.) @ 25(°C)	366,855 for 1 Link (1 Bu + 1 RHU)	

(¹) Distance increases with correlation to cable diameter.

For distance greater than 2000m contact Foxcom Wireless.

Standards and Approvals

Europe	CE 0681 / ETS 300 609-4 (GSM 11.26), ETS 300 342-3, EN 60950 / EN 60825-2
U.S.A	FCC 47 CFT Part 22, 24, 90
Canada	IC

Alarm Specifications

Base Unit Alarms

The Litenna™ Base Unit alarms are Dry Contacts and Open Collector types. The Dry Contacts opens when the alarm is active. The Open Collector will sink up to 30mA under alarm condition. All alarms are connected to the Base Unit rear panel 25 pin D type connectors.

Alarm	Function
Optical Link	Indicates that the optical link between Base Unit and Remote Hub Unit are not functioning

LED Specifications

Base Unit LEDs

The Base Unit has three types of LEDs. One type indicates the power status. One type indicates that the lasers are functioning. One type indicates the status of link operations between the Base Unit and the RHU-one LED for every RHU. All LEDs should be on when the unit is in operation.

LED Name	LED Function
Channel 1..8	Indicates that both directions of the optical link, between Base Unit and Remote Hub Unit, is functioning - one LED for every RHU link.
Lasers 1..4	Indicates that laser circuitry for RHU 1-4 is functioning correctly.
Lasers 5..8	Indicates that laser circuitry for RHU 5-8 is functioning correctly.
DC	Indicates that the power is on.

Remote Hub Unit LEDs

On the Front Panel of the RHU there are two LEDs. Both LEDs should be on when the unit is in operation.

LED Name	LED Function
Opt.	Indicates that the Received Optical Power is functioning within specifications.
DC	Indicates that the power is on.
