## Safety Information

Please read and follow all instructions and safety guidelines in this manual.

### General Use

- Check the scale before using. **Do not** use the scale if it is damaged in any way.
- **Do not** strike or bang on the scale and **do not** use the scale if there is a slight crack on the glass. Due to the nature of tempered glass, the glass will shatter if there is a slight crack. If you see a crack, contact **Customer Support** (see page 12).
- The glass platform is slippery when wet. **Always** make sure the platform and your feet are dry before stepping onto the scale.
- Place the scale on a hard, flat surface.
- To weigh safely and accurately, stand with your feet shoulder width apart while on the scale. **Do not** stand on the edge of the scale or jump on the scale.
- **Avoid** standing on the scale for a long period of time.
- **Do not** overload the scale. Maximum weight capacity is 450 lb / 205 kg / 32 st.
- Keep the scale in a cool area with low humidity. Keep the scale away from heat sources, such as ovens or heaters.
- Store the scale horizontally, **not** vertically.
- For household use **only**. This scale is not intended for commercial use.
- Handle with care.

### Medical

- This scale should not be used to diagnose or treat any medical condition.
- Scale data should not be used as a substitute for medical advice from a health-care professional.
- This scale uses a harmless electrical current to measure body fat. Consult a healthcare professional before using the smart scale if you use electronic medical equipment such as a pacemaker.

### Batteries

- **Do not** mix new and old batteries.
- If the scale is not in use for a long period of time, remove the batteries to extend the lifetime of the scale.

## App Setup

To download the Ovutek app, scan the QR code or search "Ovutek" in the Apple App Store® or Google Play Store.

Tap the "+" button in the app.

3.Ensure the Bluetooth of your phone is on.

Just step on the scale and weigh in. Follow the app guidelines to complete the device addition.

## Automatically recognises the user

- Weighing without a mobile phone connected, the scale automatically recognises the user with the closest weight and measures body composition.
1. If your weight has changed by more than 3kg (6.5lbs) or less since your last weigh-in, the scale may no longer recognise you.
  2. Turning on Ovutek and weighing with the device connected will match the current user or manually enter your weight data and the device will recognise you again.

## Weighing Modes

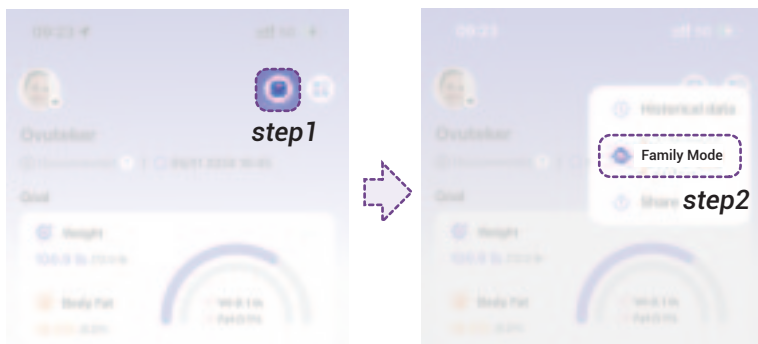

- **Zero-Current Mode:** Suitable for pregnant women or those using implanted medical devices.
1. Select Zero-Current Mode in the APP to turn on or off.
  2. When turned on, the current to your scale will be turned off, and your scale will not be able to calculate body indicators other than weight and BMI.

*Figure 6*

*Figure 6*

- **Family Mode:** To weigh your baby or pet, tap  and follow the in-app instructions for weighing. Baby Mode will not measure other body metrics and will only measure weight and BMI.

- **Athlete Mode:** Suitable for people with long-term exercise habits and athletes.
  1. Provide you more accurate body composition measurements.
  2. Use this mode if both of the following apply to you:
    - (1) Work out more than 8 hours a week.
    - (2) Resting heart rate below 60 dpm.
  3. In the user information of the APP, turn on the "Athlete" switch to enable it.

## Replacing the Batteries

- The display will show  and  when the batteries need to be replaced.

*Figure 7*

*Figure 7*

1. Open the battery compartment on the underside of the scale.
2. Remove the old batteries and dispose of them properly.
3. Install 4 new 1.5V AAA batteries. Make sure the polarities match.
4. Close the battery compartment, place the scale on a hard, flat surface.

## Cleaning the Scale

1. Use a slightly damp cloth to clean the surface of the scale, followed by a soft, dry cloth to wipe away the remaining moisture.
2. Do not use chemical or abrasive cleaning agents to clean the scale.

## Troubleshooting

## Federal Communication Commission Interference Statement – Part 15

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

**FCC Caution:** Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

### FCC Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. End users must follow the specific operating instructions for satisfying RF exposure compliance. To maintain compliance with FCC RF exposure compliance requirements, please follow operation instructions as documented in this manual. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter. The availability of some specific channels and/or operational frequency bands are country dependent and are firmware programmed at the factory to match the intended destination. The firmware setting is not accessible by the end user.
