Solder Board-Component View 4	 A photograph of a small electronic component, likely a Wi-Fi module, mounted on a blue textured surface. A black cable is connected to the top of the component. A black ruler with white markings is placed horizontally below the component, showing measurements in millimeters. The component itself has a gold-colored PCB with various electronic components and a black cable.
Antenna View	 A photograph of the back of a black electronic device, showing the internal components. Two antennas are visible, labeled "ANT1" and "ANT0". Red lines connect these labels to the "WIFI 1 Antenna" and "WIFI 0 Antenna" labels in the bottom row of the table. The device is placed on a blue textured surface.
WIFI 1 Antenna	WIFI 0 Antenna

Solder Board-Component View 2	 A photograph of a rectangular blue printed circuit board (PCB) component. The board is populated with various electronic components, including integrated circuits, resistors, and capacitors. A black cable is connected to the top edge of the board. The component is placed on a blue textured surface next to a black ruler with white markings in millimeters. The ruler shows the component is approximately 100 mm long and 30 mm wide.
Solder Board-Component View 3	 A photograph of the same blue PCB component from a different perspective. This view shows the underside of the board, which has a large, circular, silver-colored solder pad in the center. The component is placed on the same blue textured surface next to the same black ruler. The ruler indicates the component is approximately 100 mm long and 30 mm wide.

Solder Board-Component View 4	 A photograph showing the solder side of a small electronic component. The component is a square chip with a gold-colored solder mask, mounted on a blue printed circuit board (PCB). The PCB has several gold-colored solder pads. The component is positioned next to a black ruler with white markings, which shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The background is a blue textured surface.
Solder Board-Component View 5	 A photograph showing the component side of the same electronic component. The component is a square chip with a green solder mask, mounted on a blue printed circuit board (PCB). The PCB has several gold-colored solder pads. The component is positioned next to a black ruler with white markings, which shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The background is a blue textured surface.
