

Response to TCB Findings

1. Please provide the test set-up photos.

Response: Provided

2. Has the loop antenna been rotated to maximize emissions?

Response: Yes, please see the revised test report

3. Please provide details of measurement instrumentation detector and receiver settings upto 1GHz.

Response: Clarified in the revised test report

4. Please provide a detailed list of models intended to be covered with this application. Please also describe the differences if any.

Response: Clarified in the test report. Please also see the attached model information document.

5. The operational description states that the transmitter/receiver antenna is designed and integrated into the final product by OEM. If that's the case OEM needs to get approval for the transmitter.

Response: Locknetics is the OEM and the transmitter will be registered under their name. The design and operational description were provided by HID.
