Dear Sirs or Madams:

FCC Docket 98-76 contains a provision that relates to applications for equipment authorization of scanning receivers. Although it is not necessary to submit a "Request for Confidentiality" and mark the application form indicating such, the Commission will not make available for public inspection portions of the application, which contain information that might assist persons to modify the subject scanning receiver to receive Cellular Service frequencies. The portions of the above referenced application material include block diagrams, schematics, technical descriptions, and internal photos showing circuitry that will normally be covered with black epoxy.

Please contact the undersigned if you have any questions or need any further information.

Regards,

A handwritten signature in black ink that reads "James R. Haynes". The signature is stylized with a large, looped initial "J" and a cursive script.
