FCC ID: VPYLB2DK

To whom it may concern,

We, UL Japan, Inc, hereby declare that Communication Module, model: LBUA2ZZ2DK (FCC ID: VPYLB2DK) of Murata Manufacturing Co., Ltd. is exempt from RF exposure SAR evaluation.

Bluetooth (LE) part

The available maximum time-averaged power or effective radiated power (ERP), whichever is greater, is less than or equal to the threshold P_{th} (mW) described in the following formula according to the Code of Federal Regulation title 47 section 1.1307(b)(3)(i)(B). This method is used at separation distances d (cm) from 0.5 centimeters to 40 centimeters and at frequencies from 0.3 GHz to 6 GHz (inclusive) for single RF sources. P_{th} is given by:

 $P_{th} (\text{mW}) = \begin{cases} ERP_{20 \text{ cm}} (d / 20 \text{ cm})^{x} & d \le 20 \text{ cm} \\ ERP_{20 \text{ cm}} & 20 \text{ cm} < d \le 40 \text{ cm} \end{cases}$

Where

$$x = -\log_{10}\left(\frac{60}{ERP_{20 \text{ cm}}\sqrt{f}}\right)$$
 and f is in GHz

$$ERP_{20 \text{ cm}} \text{ (mW)} = \begin{cases} 2040f & 0.3 \text{ GHz} \le f < 1.5 \text{ GHz} \\ 3060 & 1.5 \text{ GHz} \le f \le 6 \text{ GHz} \end{cases}$$

When the minimum separation distance is shorter than 0.5 cm, 0.5 cm is applied.

The SAR evaluation exemption threshold is calculated as below.

Pth (mW)	2.71
f (GHz)	2.48
$ERP_{20 \text{ cm}} \text{ (mW)}$	3060
<i>d</i> (cm)	0.5

Conducted Power	(dBm)	4.13
	(mW)	2.59
Antenna Gain (dB	i)	-4.80
EIRP (dBm)		-0.67
ERP	(dBm)	-2.81
	(mW)	0.52

The Maximum time-averaged power or ERP whichever greater is 2.6 mW. (Rounded up to two decimals place)

UWB part

Its output power meets the 1-mW test exemption threshold stated in the Code of Federal Regulation title 47 section 1.1307(b)(3)(i)(A).

This device available maximum time-averaged power is 0.04 mW, so no other assessment is required.

Transmitters used in mobile exposure conditions for simultaneous transmission operations according to KDB447498 D04.

Value is calculated using the following formula according to the Code of Federal Regulation title 47 section 1.1307(b)(3)(ii)(B).

$$\sum_{i=1}^{a} \frac{P_i}{P_{th,i}} + \sum_{j=1}^{b} \frac{ERP_j}{ERP_{th,j}} + \sum_{k=1}^{a} \frac{Evaluated_k}{Exposure\ Limit_k} \le 1$$

Bluetooth (LE) part and UWB part 2.59 / 2.71 + 0.04 / 1

= 0.9557 + 0.0400

= **0.9957** ≤ 1

Thank you for your attention to this matter.
