Ref: FCC ID: R9C-1206 label location justification

Gentlemen:

GUANGDONG OPPO MOBILE TELECOMMUNICATIONS CORP., LTD requests acceptance of the labeling proposal described below for Smart Phone bearing FCC identifier R9C-1206

The subject Smart Phone are compact handheld models as shown in figure 1, authorized under 47CFR Part 22H, 24E, 27L & 27M for mobile services.

Figure 1

Because the majority of the cell phone housing is composed of display, speaker, operating controls and a removable phone cover, there is extremely limited space available to attach the required label carrying the FCC identifier. Attaching the label to the phone cover is not acceptable because the phone cover is a removable item. For this reason, GUANGDONG OPPO MOBILE TELECOMMUNICATIONS CORP., LTD proposes placing the label carrying the FCC identifier inside the cell phone compartment as shown in figure 2.

Figure 2

The consumer packaging for these models includes the phone cover as a separate item, NOT installed on the radio. As such, the FCC identifier will be readily visible to the user before the SIM card installed and whenever the cell phone cover is removed or replaced. In this location, the label will also be protected from physical abuse and remain readable for the anticipated life of the device.

The consumer packaging for these models is a "gift box" which does not allow the transceiver to be seen at time of purchase. In order to meet the requirements of 47CFR Part 2.925 (d), Infinity System S.L. will add the FCC identifier " R9C-1206 " to the outside of the consumer "gift box" packaging.

Thank you for your attention to this matter.

Yours Sincerely,

Wu Xuewen  
Certification manager  
Shenzhen BALUN Technology Co., Ltd.
