COMMENTS:

In reply to your e-mail of January 15, 1999, please see attached response from Clarion

Please call us at (416) 246-1116, if you need further info.

Best Regards,

In response to the question from FCC regarding the de-rating guideline,

1. The material of the heat sink is aluminum.

2. The thickness of the inner heat sink is 2 mm.

The inner heat sink is screwed up to the one face of the cover.

The thickness of the outer cover is 3mm. This works also as a heatsink.

3. The total surface area of the heatsink is 170.33 cm²

In response to the question from FCC regarding the protection against out-of-band operation,

The only 40 channels no less no more authorized in 95.625 have been programmed in to the memory table into the memory table of the microprocessor.
