Federal Communications Commission  
7435 Oakland Mills Road  
Columbia MD 21046

Attention: Application Review Engineer

Reference: FCC ID: MCLJ07H06903, Grant date: 03/27/2003

Subject: Class II Permissive change

To Whom It May Concern:

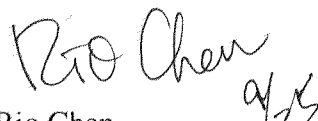

In the original certification for the grant of equipment authorization, in order to comply with 15.407(d) integral antenna requirements and 15.203 antenna requirements of FCC rules, special screws have to be used with this 802.11 a/b/g mini-pci WLAN module in the notebook computer.

Based upon the recent FCC policy, 15.203 and 15.407(d) requirements can be addressed by using Bios lock feature.

Attached please find BIOS lock specification that Ambit Microsystems Corporation has implemented in the notebook application. With the Bios lock feature implemented, we are requesting the Commission to remove "Approval is limited to OEM installation only, user installation is prohibited." limitations from the grant condition.

Based upon the technical description contains in the Bios lock specification file, we are requesting the Commission to withheld this file from public disclosure.

Best Regards
