- This device uses, generates and radiated radio frequency energy. The radio frequency energy produced by this device is well below the maximum exposure allows by Federal Communications Commission (FCC).

FEDERAL COMMUNICATIONS COMMISSION INTERFERENCE STATEMENT

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- > Reorient or relocate the receiving antenna.
- > Increase the separation between the equipment and receiver.
- > Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- > Consult the dealer or an experienced radio/ TV technician for help.

CAUTION:

Any changes or modifications not expressly approved by the grantee of this device could void the user's authority to operate the equipment.

RF exposure warning

This equipment must be installed and operated in accordance with provided instructions and the antenna(s) used for this transmitter must be installed to provide a separation distance of at least 20 cm from all persons and must not be co-located or operating in conjunction with any other antenna or transmitter. End-users and installers must be provide with antenna installation instructions and transmitter operating conditions for satisfying RF exposure compliance.

Mounting the Display

A standard VESA wall mount may be used to secure the display to wall (purchased seperately). We recommend for at least two people to mount the display on the wall.

Connecting a Video Source

NOTE: Please power off the display and the video source before plugging in the DP or HDMI cable.

Safety Precautions

- > Do not install near flammable material or any heat sources.
 - > Do not defeat the safety purpose of the grounding-type plug.
 - > Do not disassemble the display to avoid electrical shock or burn.
 - > Normal operating condition considers installation at an altitude below 2000m; some abnormalities may be experienced when installed at an altitude above 2000m.
-
- > Please power off the LCD and the video source before plugging in the DVI, DP or HDMI cable.
 - > Please installed the display in well-ventilated place, do not install in a confined space.
 - > Suitable for mounting on concrete or other non-combustible surface only.
 - > If it gives off smoke, strange smell, or unusual noise, or when it gets too hot to touch, immediately unplug the display and contact the dealer.
 - > Clean only with soft, dry cloth but not use chemical liquids, and unplug while cleaning.
 - > Do not use extreme force or any sharp or pointed objects to touch the display.
 - > Do not drop or allow any object to fall to the display.
 - > Do not operate the display with wet hands to avoid electric shock.
 - > Do not discard this product with general household waste. Please be sure to comply with the local waste regulations.
-

-
- > When a stationary or fixed image is displayed for a long time, the image may be permanently imprinted on the display. This phenomenon is known as image burn-in and is not covered by the manufacturer's warranty.
- > In order to avoid burn in, avoid prolonged display of static or fixed images on the screen.

Powering on the Display

Using & Aiming the Remote
